Electrical Current: The electric current in Portugal and Spain is 220 volts, 50 cycles and electric outlets and plugs are different from those in North America. An adapter is required for use in an electrical socket.

A voltage converter is only required if your device is not compatible with 220 volts. Check the voltage of any device that you are thinking of bringing. If the tag on your device lists 110-220 volts, you will not need a converter. Adapters and converters are available at luggage, department, and electronics stores.

Packing - Carry-On Bags: Bags with wheels are not suitable as a carry-on bag in Europe where the motorcoaches have very limited space. Regulations imposed by the European Union do not allow carry-ons on the motorcoach that do not fit in the overhead bins. Some airlines are now charging fees for carry-on bags.

Packing Note: Washcloths are not standard in European hotels. Feel free to bring them with you.

Public Facilities: Some public restrooms may require a small fee to use. You may wish to have local coins available for these situations. All tap water is safe to drink. The hot and cold-water faucets may be the opposite of North America and hot water can be extremely hot.

Value Added Tax (VAT): There is a Value Added Tax in Portugal and in Spain. This tax is levied on most goods except for food and many services. In certain cases, the Value Added Tax on goods that are exported to the United States can be

reimbursed to you upon completion and submission of a special form. There may be a service charge for the forms deducted from your reimbursement.
